

2019 Harvest : High Quality Hemp Flower & Clones

OTTO II : FRANKLIN

The Franklin phenotype is a vigorous plant with moderate to long internodes. Franklin has shown, in greenhouse trials, to have above average powdery mildew resistance especially compared to other phenotypes and genetics. Franklin is also a rapid rooting plant. This plant shows high tests in the terpenes Caryophyllene. The flower at maturity is spicy with hints of pepper and clove with a piney finish.

Average CBD-A: 10% - 14+% Average THC: 0.034%

Ratio CBD/THC: 39.47:1

Maturity Week: 7
